

In the Shadows of Steam

Tech spec Winter 2016

A professional quality, well maintained, 3 or 4 way active, stereo system capable of producing a clean undistorted SPL of 115dbA at the mix position, which should be in front and central to the stage at a reasonable distance – power and cabinet configuration to be agreed with the tour manager to suit venue.

A minimum of one competent sober engineer to be present at all times to assist touring engineer. System to be set up and checked prior to agreed sound check time.

Preferred speaker type

- D&B, L'acoustics, Adamson...Line array is preferred where appropriate

Preferred mixing consoles

- Avid profile / SC48
- Soundcraft Vi series
- Midas Pro series
- Yamaha M7
- LS9/X32 in small venues ok

Outboard for analogue console (not a preferred option)

- Graphics in line on Master outputs and inserted on all wedge sends (KT DN360, 370)
- 8 channels of compressors (dbx 160), 4 channels of gates (Drawmer ds201, ds404)
- 4 effects units - 3 x Professional reverb (Yam SPX2000), 1 x D2

If an analogue board please note we will only share drum channels, all other channels used by us must be left untouched.

Monitors

Please supply 5 paired wedge mixes. D&B M2 or M4 preferred.

We will not be travelling with a monitor engineer.
